

# **P** PRO-MAX **PRO-MIG 500**

25-PM500

The Promax PRO-MIG 500 is an automatic gas shielded arc welder, its feature includes energy saving, high efficiency high concentrated CO<sub>2</sub> arc heat, strong arc penetration, deep melting depth, high wire melting rate and high speed welding with no slag.

**Features:**

- Professional Three Phase MIG Welder
- Separate Wire Feeder
- Power Indicator
- Thermal Protection
- Digital Display
- 30 Heat Settings
- Stepless Wire Feed Setting
- Four Roller
- Burn Back Time Adjustment
- Usable with 20Kg Spool
- Water Cooling Optional
- Includes Cable Kit + MB 40 Torch + Flow Meter

It is suitable for low carbon, low alloy steel welding, it can also weld stainless steel with mixed gas (CO<sub>2</sub> and Argon) as shielded gas with the proper wire.

Input Power	Rated Input Current	Rated Input Capacity	Open Circuit Voltage	Output Range	Rated Output	Rated Working Voltage	Weight	Dimension
380 V	47 A	25 KVA	50 V	90 - 500 A	60% @ 500 A	18.5 - 39 V	164 Kg	930 x 620 x 850mm
